TECHNICAL SPECIFICATIONS

TECHNICAL SPECIFICATIONS	FF24063
Length	5"/127mm
Width	4.2"/107mm
Height	2.8"/72mm
Weight	9.4
Material (bag)	600D Nylon

USING THE CHAMBER BRUSH:

1. Separate the upper receiver from the lower receiver and remove the bolt carrier group and charging handle.
2. Attach the 3 brass rods to the handle.
3. Attach the chamber brush of the appropriate caliber to the end of the brass brush.
4. Insert the chamber brush in to the chamber through the bolt carrier slot.
5. Push and pull it through the star chamber to clean the chamber of any debris.

USING THE BRUSHES:

1. The brushes attach to the handle on the side opposite the threaded insert. Simply push them in to the hole in the handle.
2. These can be used for brushing the insides of the receiver

USING THE BORE BRUSHES, BORE MOP, AND SLOTTED TIP:

1. Attach the bore brush/ bore mop/ slotted tip for the appropriate caliber to the flexible cable. If using the slotted tip insert a cleaning tip through the slot
2. Hold upper receiver with barrel oriented in a vertical direction.
3. Feed the opposite end of the cable through the barrel until it comes out the other side of the barrel.
4. Insert the end of the flexible cable in to the hole in the side of the handle that does not have a ledge.
5. Slide over to opposite side of the slot so that it locks in when pulled.
6. Pull the cable all the way through.
7. Repeat steps 2-6 until bore is cleaned

USING THE LUBRICATION APPLICATOR

1. The bottle can be filled with your lubrication of choice by removing the cap and pulling off the applicator tip.
2. Apply lubrication where needed

Notes

FIREFIELD WARRANTY

Please visit www.fire-field.com for warranty details and information.

The image shows a close-up, high-angle view of a fire. The background is a bright, glowing orange and yellow, representing the intense heat of the flames. Numerous small, dark, irregular particles, likely sparks or embers, are captured in mid-air, falling from the top of the frame towards the bottom. The overall effect is one of dynamic movement and intense heat.
